

Preventing the unknown and catching the known

Achieve proactive security with Thor Premium Enterprise

Are you as an IT administrator looking to simplify your day to day life by proactively stopping malware from reaching your systems, using IOA/IOC's as an EDR add-on and Threat Hunting to find malware that Antivirus cannot see, whilst also continuing to have all the traditional detections mechanisms at your disposal?

With Thor Premium you will be getting a cost-effective, multi-layered, proactive and reactive security suite.

This package includes next-gen threat prevention based on dual machine learning at both Traffic and File level + a powerful antivirus with 100% detection rate

- Silent, automatic vulnerability and patch management system
- Ability to stop and identify malware attacks before they reach your systems
- Ability to hunt and identify threats or processes that antivirus cannot see
- Unique IOAs/IOCs detection, working fluently as a EDR add-on, including HIPS/HIDS
- Unique threat prevention layer to stop ransomware, data leakage, viruses, APTs, exploits & other threats
- Next-Gen and traditional Antivirus integrated with the EDR / HIPS / HIDS module
- GDPR compliance in a streamlined, efficient package

"We've been able to save huge amounts of time in deploying the latest software patches in our company and make sure that our endpoints are not only kept to date, but also safe from all these attacks."

DPD SLOVAKIA

Thor Foresight is the first component of the Thor Premium Enterprise package. Thor Vigilance, our Next-Gen antivirus with 100% detection, completes it to offer multiple security layers.
